EDUCATION

2022 - Present
Bogotá, Colombia
Expected graduation: June 2027

Systems and Computer Engineering
Universidad Nacional de Colombia
Relevant coursework: Software Architecture, Data Structures & Algorithms, Computer Networks

TECHNICAL SKILLS

- **Languages:** Python, JavaScript/TypeScript, Go, SQL
- **Frameworks & Libraries:** FastAPI, Flask, React, NodeJs
- **Tools & Infrastructure:** Git/Github, Linux, Docker, Firebase, GCP, Google Colab
- **Architecture & Concepts:** System Design, REST API, Microservices, Computer Networks
- **Spoken Languages:** Spanish (native), English (Advanced), German (Intermediate)

PROJECTS

Runpath | Backend & Cloud Architecture Project *September, 2025 - December, 2025*
Github
Technologies: Python, FastAPI, Express.js, Nginx, Firebase, Docker, Google Cloud Platform (GCP)

- Architected a robust microservices infrastructure by implementing an ExpressJS API Gateway and an Nginx reverse proxy, optimizing request routing and improving overall system scalability.
- Engineered a secure authentication backend leveraging FastAPI and Firebase, ensuring reliable identity management and access control.
- Established a secure communication channel between internal services using self-signed certificates to ensure data integrity across the network.
- Collaborated in the containerization of services using Docker and deployed functional Pods to Google Cloud Platform (GCP) to test and validate system availability in a cloud environment.

Mascotas Bogota | Core Backend Development *April, 2025 - August, 2025*
Github
Technologies: Python, Flask, MongoDB, Prometheus, Grafana

- Developed the core RESTful API for a community-driven pet-tracking platform using Python and Flask, handling CRUD operations for user publications.
- Designed and implemented efficient NoSQL database schemas using MongoDB to store and query location-based data and user reports.
- Engineered an observability and telemetry pipeline using Prometheus and Grafana, establishing real-time monitoring for application health and backend performance metrics.
